Problem statement

(1)Market Access — Odisha's Local Products Remain Invisible Beyond Regional Markets

Invisible Beyond Local Haats

Odisha's 30 districts produce unique handicrafts, GI-tagged foods, textiles and tribal goods, but most are only available in local haats or seasonal fairs.

No Digital Tools or Fair Pricing

Artisans and producers lack digital tools, a reliable customer base, and fair pricing mechanisms.

No Unified Marketplace

No single dedicated marketplace exists to showcase all district-famous and GI-tagged products of Odisha in one place with authentication.

(2) Cultural Extinction — Traditional Odisha Products Are Slowly Disappearing

1 Products Vanishing as Youth Migrate

Products like Sambalpuri Ikat, Lanjia Saura paintings, Kansa bell metal crafts and Kandhamal turmeric are gradually vanishing as younger generations migrate to cities.

2 Ageing Artisans Without Successors

Skilled artisans are ageing without successors, causing centuries-old knowledge and techniques to be permanently lost.

3 Risk of Complete Extinction

Without proper market access, fair income, and digital visibility, these irreplaceable cultural products face complete extinction within a generation.

Why Does This Problem Exist?

Digital Illiteracy

Most artisans and weavers in rural Odisha lack digital literacy, smartphones, or internet access to sell products online independently.

Exploitative Middlemen

Producers depend on multiple intermediaries, receiving only 20–30% of the actual product value — making traditional crafts economically unviable.

No Unified Platform

There is no unified platform that digitally documents, lists, and sells all 30 districts' products with proper quality verification and authentic certification.

Youth Abandoning Crafts

Younger generations are abandoning traditional crafts for better-paying urban jobs, leaving skills undocumented and crafts at risk of extinction.

Poor GI Marketing

GI-tagged products like Kandhamal Turmeric, Koraput Kala Jeera Rice, and Dhenkanal Magji have poor national marketing, so buyers outside Odisha are simply unaware they exist.

No Digital Infrastructure

Lack of government-backed or private digital infrastructure connecting rural artisans to pan-India customers has created a long-standing market gap.

Who Uses OdishaKart?

Internal Users

Platform Administrators & IT Support

- Manage and maintain the platform
- Handle user accounts and access
- Monitor system performance
- Resolve technical bugs and issues
- Ensure data security and backups

Logistics & Operations

- Manage order fulfillment process
- Coordinate with delivery partners
- Track shipment status
- Handle returns and replacements
- Monitor warehouse and stock

Vendor and Seller

- Register and list products
- Manage their seller profile
- Update stock and pricing
- Receive and process orders
- Access earnings and reports
- Communicate with support team

External Users

Delivery Partners

- Pick up orders from sellers
- Deliver to customer location
- Update delivery status
- Handle failed deliveries
- Process cash-on-delivery

Customers

- Browse and search products
- Place and track orders
- Make secure payments
- Write product reviews
- Return or report issues

Project Objectives

01

Unified District-Wise Marketplace

To develop a user-friendly e-commerce web and mobile platform that lists authentic, district-wise famous products of all 30 districts of Odisha, enabling buyers across India to shop conveniently.

02

Empower Artisans & SHGs

To empower local artisans, weavers, tribal producers, and SHGs by providing a direct-to-consumer sales channel — eliminating middlemen and ensuring fair prices and sustainable income.

03

Preserve Cultural Heritage

To preserve and promote Odisha's fast-disappearing cultural heritage and GI-tagged products by giving them national digital visibility before they become extinct.

04

Product Authentication & Quality

To implement a product authentication and quality verification system so that buyers receive genuine, certified local products — building trust and brand identity for Odisha's handmade goods.

05

Multilingual Interface

To integrate a multilingual interface (Odia, Hindi, English) and seller onboarding support so that even non-tech-savvy artisans from rural areas can register, list products, and manage orders easily.

Hands-on Activity — Information Levels

Strategic Information

- Total revenue growth per quarter
- Districts with highest demand
- Market expansion plans
- GI product categories to prioritize
- Govt. / MSME partnership decisions
- Long-term investor funding plan

Tactical Information

- Monthly seller onboarding targets
- District-wise listing progress
- Delivery partner performance
- Marketing campaign results
- Customer return rate

Operational Information

- Orders placed, shipped, delivered
- New seller registrations today
- Support tickets raised
- Stock availability per product
- Payment transaction status
- Return s refund requests

User and Activity

Customer Activities

- Sign up / Login to create an account.
- Search and filter products.
- View product details
- View seller/artisan profile
- Add items to the cart or Wishlist.
- Make payment using UPI, card, or Cash on Delivery (COD).
- Place and confirm orders.
- Track the order in real time.
- Receive Order
- Write reviews and ratings.
- Request a return or refund.
- View order history

Seller Activities

- Sign up / Login.
- Register and Update profile
- Manage the store and list products.
- Update stock, pricing, and the item list.
- Receive Order and confirm orders.
- Access earnings and generate order reports.
- Communicate with the support team.

Administrator Activities

- Sign up / Login.
- Manage users.
- Approve seller registrations and manage sellers.
- Verify product authenticity.
- Manage product listings.
- Monitor all orders.
- Handle complaints and refunds.
- Maintain payment records.
- Generate sales reports.
- Manage delivery partners.
- Send promotions and offers.
- Block fraudulent accounts.
- Maintain platform settings.

Delivery Partner Activities

- Sign up / Login.
- Check available orders.
- Accept the order.
- Pick up orders directly from sellers.
- Deliver the order to the customer's location.
- Process cash-on-delivery transactions.
- Update delivery status.
- Handle failed deliveries.
- Submit a delivery report.

• Nuapada	Khaja, Pattachitra
• Puri	Khaja, Pattachitra

CONCLUSION

Conclusion

OdishaKart is a socially impactful, technically feasible, and economically viable e-commerce platform designed to solve a real and urgent problem — the invisibility and extinction of Odisha's district-famous and GI-tagged products.

By connecting rural artisans, weavers, tribal producers, and SHGs directly to pan-India customers, the platform eliminates middlemen, ensures fair income, and gives cultural heritage the digital visibility it deserves. With multilingual support, product authentication, real-time tracking, and a structured information system, OdishaKart is not just a marketplace — it is a movement to preserve Odisha's identity.
